

**ISSUE 1**

**A RECENT SUCCESS**

We have started **Child Sponsorship Programme** in the Himalayan Regions of West Bengal. Ten children are being supported with Education, Health and Nutrition for a healthier grown up to be a human being right now!

We are moving towards a target of sponsoring fifty children whose families are financially marginalized in this year of 2017-18.

Visit [www.nidsofbengal.in](http://www.nidsofbengal.in) for details.

We are with the **Mission** to empower the people, living in remote areas, with knowledge and financial independency which will directly alleviate standard of livelihood and merge the underprivileged people with the mainstream society. Through this improvement, we aim to reduce domestic violence and create opportunities so they can alter or leave their unsafe surroundings.

We are also with the **Vision** is to merge the underprivileged people with the mainstream society, under the same roof, in terms of basic educational and financial literacy along with earning their own livelihood. We want to emphasize on child development since they are the youth of tomorrow. Environmental education and women empowerment are two other aspects of our holistic vision.

**CHILDREN SPONSORSHIP PROGRAMME**

Children from under privileged sector have to face harsh reality of life at a very early age. A significant amount of research have revealed that children from economically deprived families are more prone to take up drug peddling, alcoholism, drug abuse and be victims of sexual exploitation in their search of livelihood. We are sure that there are many of you who would like to sponsor a child so that he/she gets proper nutrition and education.

So, NIDS is giving you this opportunity to sponsor a poverty-stricken, underprivileged child and help him/her to be educated and stay healthy. It is said that a healthy mind resides in a healthy body. So, a child needs to get proper nutrition so that he/she can be healthy and perceive the education imparted to them.

The basic idea of NIDS, regarding destitute child development, is to build a stronger and educated society where children will grow up to confident adults and can earn their own livelihood.

**Sponsorship Distribution Programme**

## FINANCIAL LITERACY AWARENESS CAMPAIGN

NIDS aspires to design, build and incubate evidence based interventions to break the intergenerational tradition. Our aim to be sustainable begins and works with government system also to empower socio-economically backward community through a holistic approach.

We were also assigned by Uttar Banga Khetriyo Gramin Bank, Paschim Banga Gramin Bank and Darjeeling District Central Cooperative Bank to conduct more than 440 Financial Literacy and Digital Financial Literacy Awareness Campaign in the different districts of West Bengal. This year we have reached 18396 people including women with messages of Financial Literacy.

## FORTHCOMING PROGRAMME – SCHOOL FOR HEARING IMPAIRED AND MENTALLY CHALLENGED CHILDREN

Hearing impairment and Mental disorderness among the children are increasing day by day due to the ultra modern civilized practice among the society. We have observed that the entire system to fight against these disorderness mostly concentrated and available in the urban areas.

So, we are going to set up an institute for the victims of these disorderness in a remote area of North 24 Parganas where we would like to set up such Institute with modern amenities and techniques which help them to be mainstreamed with proper respect and dignity.
